## PROFESSIONAL SUMMARY

Self-taught Frontend Engineer passionate about solving real user problems through clean, efficient, and scalable web solutions. Skilled in React.js and Next.js, with a strong focus on reusable UI architecture, performance optimization, and creating seamless user experiences. Dedicated to writing clean code, building intuitive interfaces, and delivering impactful products that drive business growth.

## PROJECTS/EXPERIENCE

**Frontend Engineer**                                                                                    **2024 - Present**

### incite360 (crud dashboard)
- Engineered a high-performance web dashboard empowering businesses to manage and secure employer profiles efficiently.
- Built with **React**, **Tailwind CSS**, **TanStack**, and **React Hook Form**, delivering a responsive and scalable user experience.
- Implemented robust **CRUD functionality** and optimized client-server data flow for seamless performance.
- Designed a clean, intuitive interface for administrators to organize and update employee data with ease.
- Independently handled the **frontend development**, strengthening expertise in API integration, state management, and component architecture.

### pulsepoint-mini-mart
- Built a responsive e-commerce platform enabling users to browse and order clothing for all genders.
- Developed with **React**, **Tailwind CSS**, and **Redux Toolkit**, ensuring fast performance and centralized state management.
- Implemented dynamic product listing, cart management, and order functionality for a smooth shopping experience.
- Focused on efficient **data handling and server communication**, gaining strong insight into managing asynchronous state and API-driven workflows.

### tourvisto
- Developed a dynamic, responsive travel platform that enables users to plan trips and book destinations seamlessly.
- Translated Figma designs into a functional frontend using **React**, **Tailwind CSS**, and **Redux Toolkit** to ensure scalability and smooth state management.
- Integrated **Google Authentication** for secure and seamless user sign-in via email.
- Focused on clean architecture, smooth animations, and performance optimization to enhance overall user experience.
- Independently managed the **frontend development**, emphasizing modular code and intuitive user flow.

## EDUCATION

**Federal Univeersity of Technology, Minna**                                      **April 2023 -**
                                                                                                        **Present**
Bachelor Of Technology: Surveying And Geoinformatics                         Minna, Nigeria

**Faculty of Engineering, Federal School of Surveying**                         **August 2021**
Diploma in Geomatic Engineering.                                                          Oyo, Nigeria

## SKILLS

- **Frontend**: NextJS,  ReactJS, Typescript, Javascript, Redux toolkit,  React Tanstack Query, TailwindCSS, Shadcn, Material UI, Framer motion, Git & Github.
- **Product Design Skills**: Figma.
- **Languages**: English (native), Yoruba.
